

Cancer Care Plus

Cancer and Dread Disease Insurance

A Cancer and Dread Disease - Only Insurance Policy

Why Cancer Insurance?

According to the American Cancer Society:

- In the United States, men have about a 1-in-2 lifetime risk of developing cancer; for women the risk is a little more than 1-in-3.
- It is projected that on an annual basis over 1.6 million new cancer cases will be diagnosed.

Additionally, cancer treatment can cause out-of-pocket expenses that aren't covered by traditional health insurance:

Although health insurance can help offset the costs of cancer treatment, you still may have to cover deductibles and copayments on your own. Meanwhile, living expenses such as car payments, mortgages or rent, and utility bills continue whether or not you are able to work. If a family member has to stop working to take care of you, the loss of income may be doubled. The Company helps provide an important safety net in fighting the financial consequences of cancer that result beyond traditional health insurance. The Company pays benefits directly to you, unless assigned. You use the cash however you decide.

Why Our Cancer Insurance?
