

Patient care is and always has been Survival Flight's first and foremost priority. This is why we only partner with top quality hospitals when we place an aircraft in a community. This ensures continuity of care at the highest of standards. This is also why all of our aircraft have the ability for a patient's family member to ride along on the flight. This family member interaction is crucial in our opinion. Watching a loved one fly off not knowing where they are going and having no means to follow them is a very traumatic experience. The only aircraft we are placing within the new communities we service is a Bell 407 equipped with state of the art avionics and EMS equipment. This aircraft is much larger, has an increased weight capacity, and a much higher flight speed than what most communities are presently seeing. This increased speed can be what makes the difference between life and death in a traumatic situation. We understand that anytime Survival Flight is called it is a catastrophic event that no one plans for. We at Survival Flight never want our services to cause a financial hardship; therefore, we offer a very generous charity program. We also offer a Survival Flight Air Ambulance Membership plan at a very competitive rate. We provide greatly reduced group purchases to ease any burden that owning a Survival Flight membership may place on a family or individual. Memberships also apply to Survival Flight Ground EMS. If you have any additional questions regarding our charity or membership programs please contact us at (877)-581-6530 and press 3 for billing and 4 for memberships or visit our website at [www.survivalflightinc.com](http://www.survivalflightinc.com).

You have the opportunity to become a Survival Flight member for \$40 annually, and this covers everyone in the household.

If you have any questions about Survival Flight membership, please contact Membership Manager, Cheyne Newberry at 501-691-3847 or [cnewberry@survivalflightinc.com](mailto:cnewberry@survivalflightinc.com)
